| Degree of Protection                            |                |      | IP20, IP40 (when fitted)                |
| Terminals top and bottom                        |                |      | Twin-purpose terminals                  |
| Mounting position                               |                |      | As required                             |

# **Design verification as per IEC/EN 61439**

| Technical data for design verification                                    |                   |      |   |
|---|-------------------|------|---|
| Rated operational current for specified heat dissipation                  | In                | Α    | 32  |
| Heat dissipation per pole, current-dependent                              | P <sub>vid</sub>  | W    | 0   |
| Equipment heat dissipation, current-dependent                             | P <sub>vid</sub>  | W    | 10.2  |
| Static heat dissipation, non-current-dependent                            | $P_{vs}$          | W    | 0   |
| Heat dissipation capacity   | P <sub>diss</sub> | W    | 0   |
| Operating ambient temperature min.  |                   | °C   | -25   |
| Operating ambient temperature max.  |                   | °C   | 75  |
|   |                   |      | linear, per +1 °C, results in a 0.5% reduction of current carrying capacity |
| EC/EN 61439 design verification   |                   |      |   |
| 10.2 Strength of materials and parts                                      |                   |      |   |
| 10.2.2 Corrosion resistance   |                   |      | Meets the product standard's requirements.                                  |
| 10.2.3.1 Verification of thermal stability of enclosures                  |                   |      | Meets the product standard's requirements.                                  |
| 10.2.3.2 Verification of resistance of insulating materials to normal hea | port call K       | MPar | t Meets the product standard S requirements.                                |

| 10.2.3.3 Verification of resistance of insulating materials to abnormal heat and fire due to internal electric effects | Meets the product standard's requirements.   |
|--|--|
| 10.2.4 Resistance to ultra-violet (UV) radiation   | Meets the product standard's requirements.   |
| 10.2.5 Lifting   | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.2.6 Mechanical impact   | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.2.7 Inscriptions  | Meets the product standard's requirements.   |
| 10.3 Degree of protection of ASSEMBLIES  | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.4 Clearances and creepage distances   | Meets the product standard's requirements.   |
| 10.5 Protection against electric shock   | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.6 Incorporation of switching devices and components   | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.7 Internal electrical circuits and connections  | Is the panel builder's responsibility.   |
| 10.8 Connections for external conductors   | Is the panel builder's responsibility.   |
| 10.9 Insulation properties   |  |
| 10.9.2 Power-frequency electric strength   | Is the panel builder's responsibility.   |
| 10.9.3 Impulse withstand voltage   | Is the panel builder's responsibility.   |
| 10.9.4 Testing of enclosures made of insulating material   | Is the panel builder's responsibility.   |
| 10.10 Temperature rise   | The panel builder is responsible for the temperature rise calculation. Eaton will provide heat dissipation data for the devices. |
| 10.11 Short-circuit rating   | Is the panel builder's responsibility. The specifications for the switchgear must be observed.                                   |
| 10.12 Electromagnetic compatibility  | Is the panel builder's responsibility. The specifications for the switchgear must be observed.                                   |
| 10.13 Mechanical function  | The device meets the requirements, provided the information in the instruction leaflet (IL) is observed.                         |

## **Technical data ETIM 6.0**

Circuit breakers and fuses (EG000020) / Miniature circuit breaker (MCB) (EC000042)

Electric engineering, automation, process control engineering / Electrical installation, device / Miniature circuit breaker system (MCB) / Miniature circuit breaker (MCB) (ecl@ss8.1-27-14-19-01 [AAB905011])

| Release characteristic   |    | С       |
|--|----|---------|
| Number of poles (total)  |    | 3       |
| Number of protected poles                                      |    | 3       |
| Nominal rated current  | Α  | 32      |
| Nominal rated voltage  | V  | 415     |
| Rated short-circuit breaking capacity Icn EN 60898 at 230 V    | kA | 0       |
| Rated short-circuit breaking capacity Icn EN 60898 at 400 V    | kA | 0       |
| Rated short-circuit breaking capacity Icu IEC 60947-2 at 230 V | kA | 15      |
| Rated short-circuit breaking capacity Icu IEC 60947-2 at 400 V | kA | 15      |
| Voltage type   |    | AC      |
| Current limiting class   |    | 3       |
| Frequency  | Hz | 50 - 60 |
| Concurrently switching N-neutral                               |    | No      |
| Suitable for flush-mounted installation                        |    | No      |
| Over voltage category  |    | 3       |
| Pollution degree   |    | 2       |
| Width in number of modular spacings                            |    | 3       |
| Built-in depth   | mm | 70.5    |
| Additional equipment possible                                  |    | Yes     |
| Degree of protection (IP)                                      |    | IP20    |
