| Static heat dissipation, non-current-dependent                              | P <sub>vs</sub>   | W    | 0                                                                           |
| Heat dissipation capacity                                                   | P <sub>diss</sub> | W    | 0                                                                           |
| Operating ambient temperature min.                                          |                   | °C   | -25                                                                         |
| Operating ambient temperature max.                                          |                   | °C   | 75                                                                          |
|                                                                             |                   |      | linear, per +1 °C, results in a 0.5% reduction of current carrying capacity |
| IEC/EN 61439 design verification                                            |                   |      |                                                                             |
| 10.2 Strength of materials and parts                                        |                   |      |                                                                             |
| 10.2.2 Corrosion resistance                                                 |                   |      | Meets the product standard's requirements.                                  |
| 10.2.3.1 Verification of thermal stability of enclosures                    |                   |      | Meets the product standard's requirements.                                  |
| 10.2.3.2 Verification of resistance of insulating materials to normal here. | port call l       | KMPa | Meets the product standard's requirements.                                  |

| 10.2.3.3 Verification of resistance of insulating materials to abnormal heat and fire due to internal electric effects | Meets the product standard's requirements.                                                                                       |
|------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------|
| 10.2.4 Resistance to ultra-violet (UV) radiation                                                                       | Meets the product standard's requirements.                                                                                       |
| 10.2.5 Lifting                                                                                                         | Does not apply, since the entire switchgear needs to be evaluated.                                                               |
| 10.2.6 Mechanical impact                                                                                               | Does not apply, since the entire switchgear needs to be evaluated.                                                               |
| 10.2.7 Inscriptions                                                                                                    | Meets the product standard's requirements.                                                                                       |
| 10.3 Degree of protection of ASSEMBLIES                                                                                | Does not apply, since the entire switchgear needs to be evaluated.                                                               |
| 10.4 Clearances and creepage distances                                                                                 | Meets the product standard's requirements.                                                                                       |
| 10.5 Protection against electric shock                                                                                 | Does not apply, since the entire switchgear needs to be evaluated.                                                               |
| 10.6 Incorporation of switching devices and components                                                                 | Does not apply, since the entire switchgear needs to be evaluated.                                                               |
| 10.7 Internal electrical circuits and connections                                                                      | Is the panel builder's responsibility.                                                                                           |
| 10.8 Connections for external conductors                                                                               | Is the panel builder's responsibility.                                                                                           |
| 10.9 Insulation properties                                                                                             |                                                                                                                                  |
| 10.9.2 Power-frequency electric strength                                                                               | Is the panel builder's responsibility.                                                                                           |
| 10.9.3 Impulse withstand voltage                                                                                       | Is the panel builder's responsibility.                                                                                           |
| 10.9.4 Testing of enclosures made of insulating material                                                               | Is the panel builder's responsibility.                                                                                           |
| 10.10 Temperature rise                                                                                                 | The panel builder is responsible for the temperature rise calculation. Eaton will provide heat dissipation data for the devices. |
| 10.11 Short-circuit rating                                                                                             | Is the panel builder's responsibility. The specifications for the switchgear must be observed.                                   |
| 10.12 Electromagnetic compatibility                                                                                    | Is the panel builder's responsibility. The specifications for the switchgear must be observed.                                   |
| 10.13 Mechanical function                                                                                              | The device meets the requirements, provided the information in the instruction leaflet (IL) is observed.                         |
