

- > Designed for control circuits with high inrush
- > Response time of instantaneous trip: 13 – 17 x I_n current rating
- > UL Recognized and CSA Certified as Supplementary Protectors
- > For international and domestic use (conform to IEC / EN60898)

Type S Characteristics

Suitable for applications with highly inductive loads, especially in control circuits with coils and light filaments. Instantaneous response between 13 to 17 x rating of device (I_n).

Trip Characteristic S – Designed for control circuits with high inrush ①

Special Order
 These breakers are available by special order only.
 Contact your Moeller representative for more information.

① In North America, these switches are UL recognized and CSA certified as Supplementary Protection devices. Per the intent of NEC (National Electrical Code), article 240, and CEC (Canadian Electrical Code), part 1 C22.1, supplementary breakers cannot be used as a substitute for the branch circuit protective device. They can be used to provide over-current protection within an appliance or other electrical equipment where branch circuit over-current protection is already provided, or is not required. See FAZ Branch Circuit Breakers in this catalog.
